SAC600E

SANY ALL TERRAIN CRANE
60T LIFTING CAPACITY

SAC600E is an all-terrain crane with 60t lifting capacity, 6 boom sections totaling 50m, and features wireless remote control of all motions, optional anti-electromagnetic interference module, and the brand-new iCab, with driving and operation comfort fully upgraded.

50m boom

Boom full extension 50m

50m

Wireless remote control

Wireless remote control available for all actions

Anti-electromagnetic interference

An anti-electromagnetic interference module adopted, enabling well functioning under strong electric and magnetic conditions (excluding wireless operations)

)

All new iCab design

Ergonomic concept of safety and comfort

i-Cab - Driver's cab

Multi-function seat with air suspension, making driving more comfortable.

Double seats and foldable berth for the co-driver.

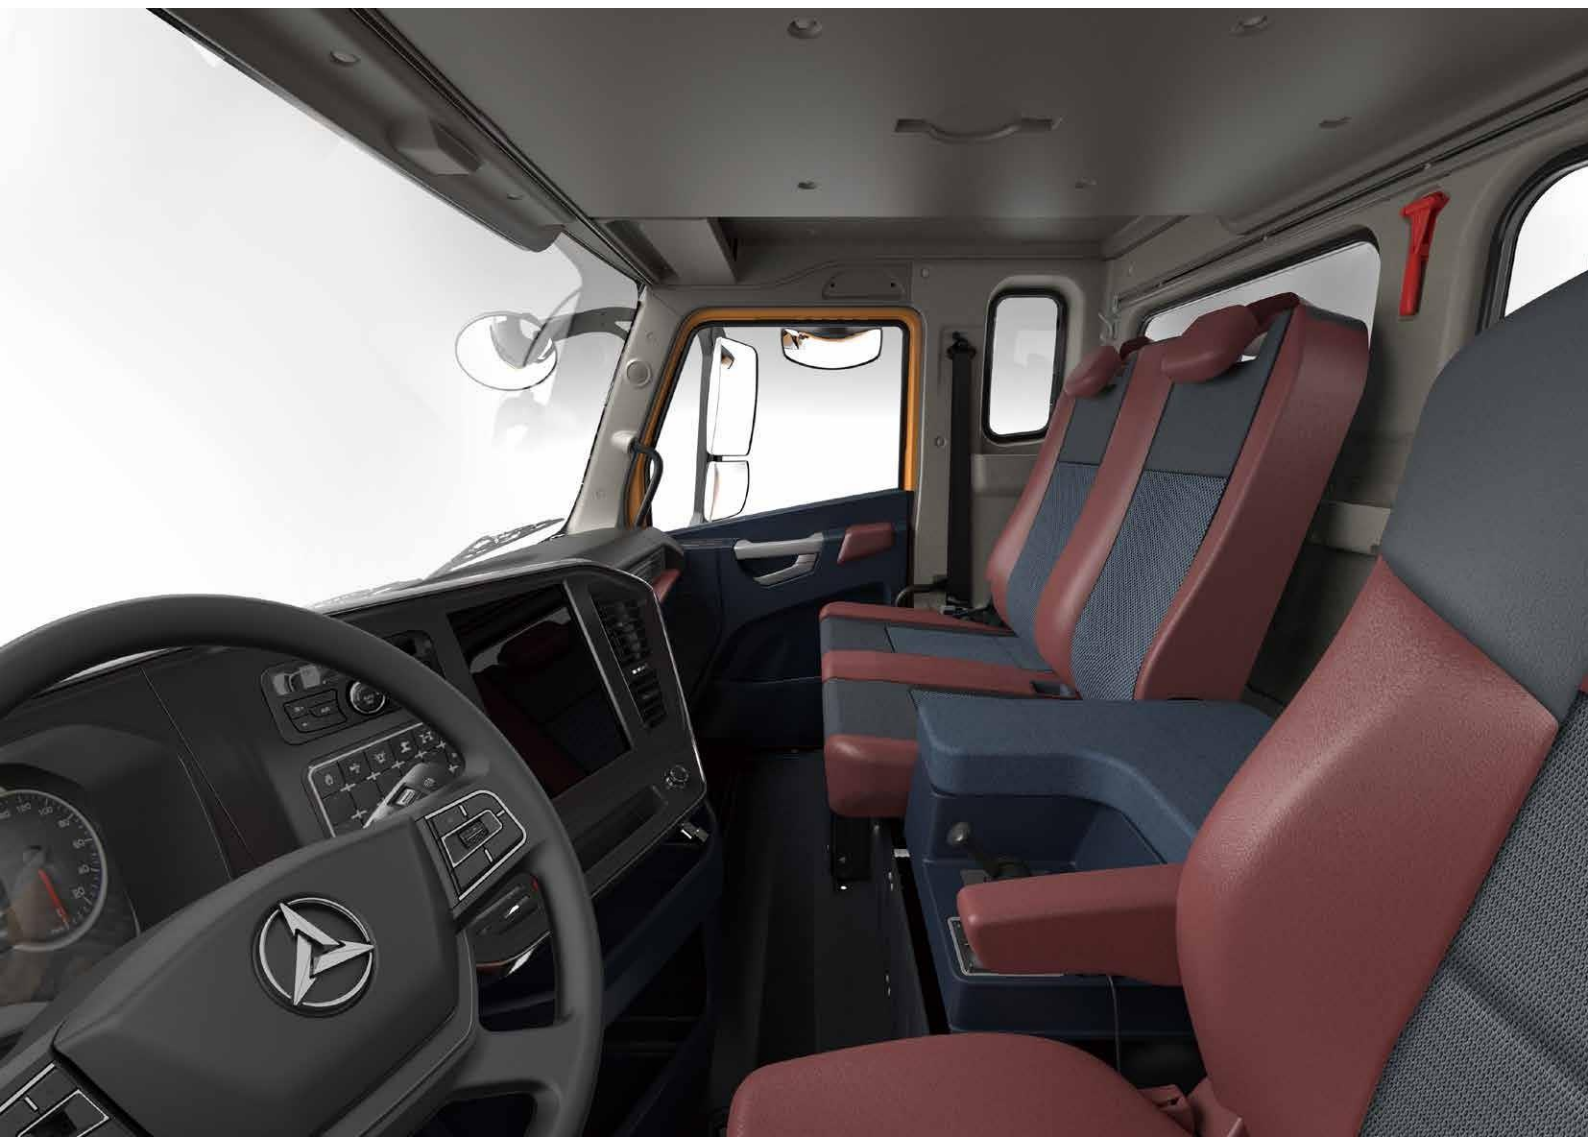

10.1-inch touch screen integrated with back-up image and multi-media.

Electric rearview mirror with electric heating, ensuring good field of view in foul weather.

Adjustable high-brightness LED headlamps/fog lamps, providing clear vision at night.

Reversing sensor with accurate distance detection capability, fully covering the parking area without blind spots, and effectively avoiding scratch and collision.

Full-automatic HVAC, able to automatically adjust indoor temperature as demanded.

i-Cab - Operator's cab

Seat widened by 450mm, and leg room increased by 30%.

Cab tiltable by 0-20°, relieving cervical fatigue during large-angle and long-boom operations.

Adjustable seat with maximum inclination of 140°, allowing the operator to lie flat and rest after work.

Electric seat linked with armrest box, enabling multi-dimensional adjustment for enhanced comfort.

Electronic control joysticks, making operation easier.

45° tilted silicone button panel, easy to reach and operate.

70° openable front window convenient for ventilation and escape; in compliance with CE standards.

Sliding door, more convenient for getting on/off the cab and opening/closing the door.

Full-automatic HVAC, able to automatically adjust indoor temperature as demanded.

°

Anti-electromagnetic Interference

Anti-electromagnetic interference module, allowing the crane to work normally in strong electric field or strong magnetic field ($\leq 20\text{V/m}$ and $> 500\text{m}$ away from interference source), including cluster construction of high-power equipment, and the vicinity of multiple interference sources including high-voltage lines, broadcasting base stations, power plants, aluminum plants, radar stations, military bases or mobile communication stations.

Wireless Remote Control System

Independently developed remote controller in compliance with European and US regulations and CE certified, realizing functions as electronic, smart and digital control as well as one-button extension and retraction, making operation very convenient.

Main functions

Outrigger control - single-piece / single-side outrigger beam and jack telescoping in/out, and one-button leveling;

One-button set-up - automatic boom telescoping, luffing, slewing, hoisting;

Auxiliary action control - counterweight lifting/lowering, jib pushing/pulling, sidestep extension/retraction, cab tilting, etc.

- Outrigger status
- Counterweight lifting/lowering, step extension/retraction
- Main parameters
- Boom telescoping

Working Condition

T: Boom

Max. lifting capacity	60t
Max. boom length	50m
Max. radius	39m
Max. height	50.5m

TAJ: Boom + auxiliary jib

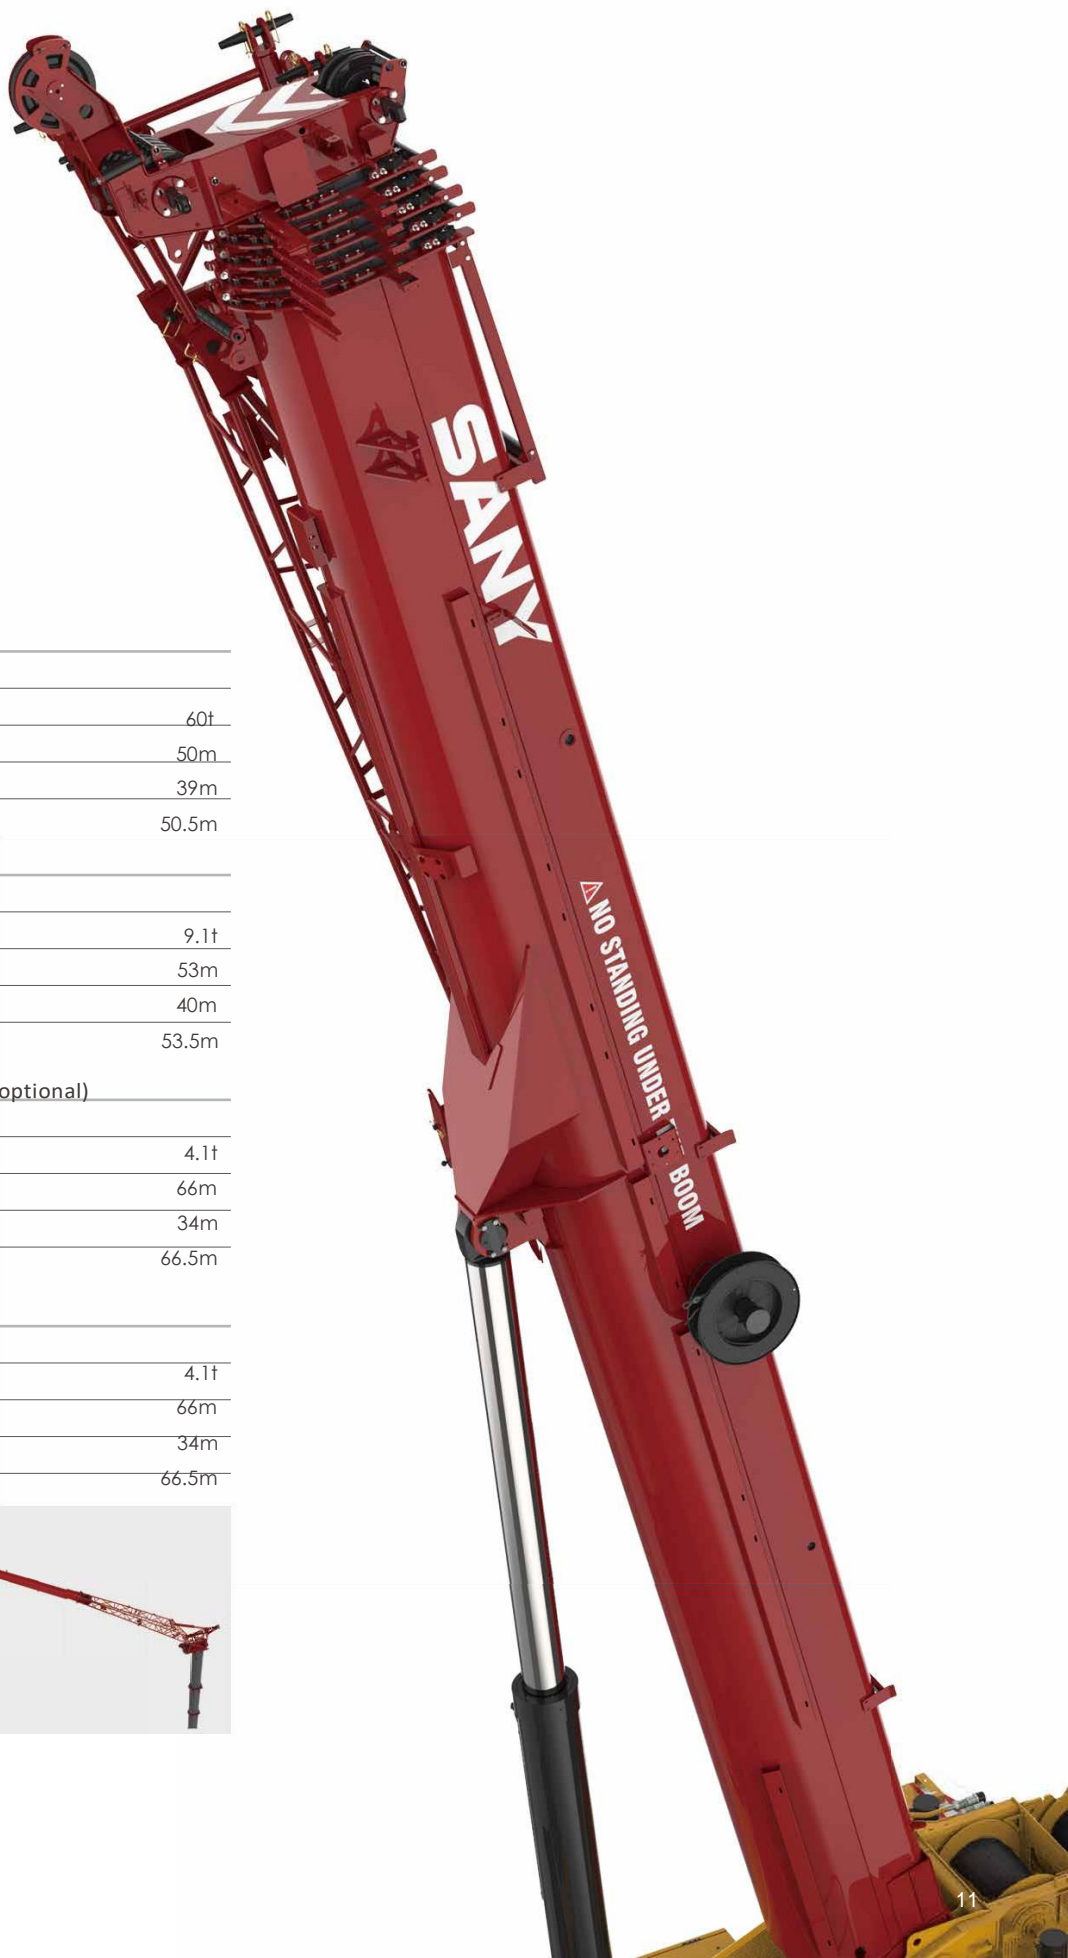

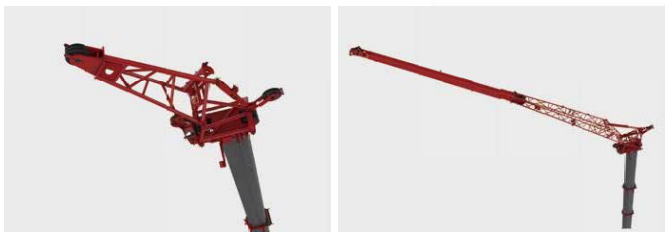

Max. lifting capacity	9.1t
Max. boom + jib length	53m
Max. radius	40m
Max. height	53.5m

THJ: Boom + hydraulically adjustable jib (optional)

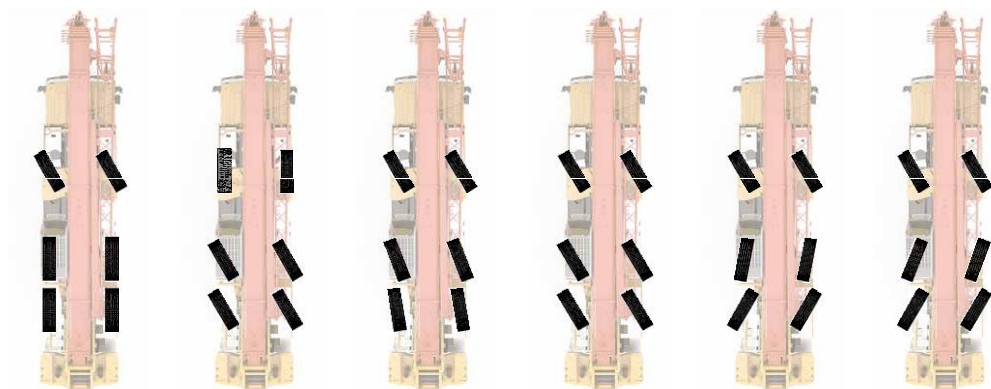

Max. lifting capacity	4.1t
Max. boom + jib length	66m
Max. radius	34m
Max. height	66.5m

TF: Boom + fixed jib

Max. lifting capacity	4.1t
Max. boom + jib length	66m
Max. radius	34m
Max. height	66.5m

Travel Flexibility

Independent front axle steering

Independent rear axle steering

Reduced swing-out steering

Crab steering

On-road driving

All-wheel steering

Traveling with counterweight and hook block on board

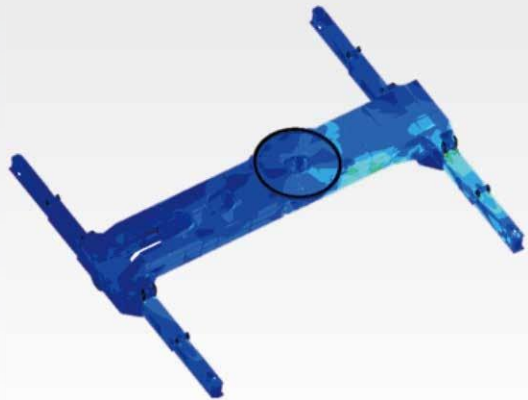

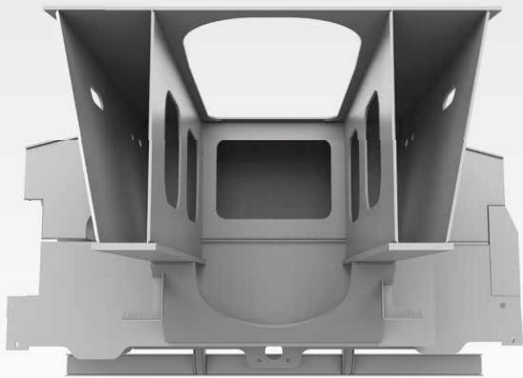

Carrier Frame

High strength frame

Carrier frame welded with fine grain high-strength steel plates of box-type section, providing a stronger anti-torsion capability than C-type or H-type construction.

Stable support

H-type outriggers of 4-point support, which is of same material and design as frame, and helps improve the stability of operation.

Power Train

Engine

Mercedes-Benz OM470LA off-road in-line six cylinder water-cooled diesel engine, complying with Stage III or **Stage V** emission standards.

Rated power: 280kW/1700rpm.

Max. torque: 1900Nm/1300rpm .

Fuel reservoir capacity: 500L.

Transmission

Allison 4500SP 6-speed AT with three-phase torque converter and planetary gear, allowing for smooth start, smooth gearshift without impact, and low maintenance cost.

Braking system

Braking system consisting of disc brake, air chamber and ABS, making the braking performance more reliable and efficient. Optional eddy current retarder, allowing for effective assist braking, reducing the wear of axle brake linings and prolonging service life. Parking brake and service brake equipped for axles 1, 2, 3.

Axles and suspension

Kessler axles with high bearing capacity and reliable quality. Hydro pneumatic suspension system with stroke of $\pm 100\text{mm}$.

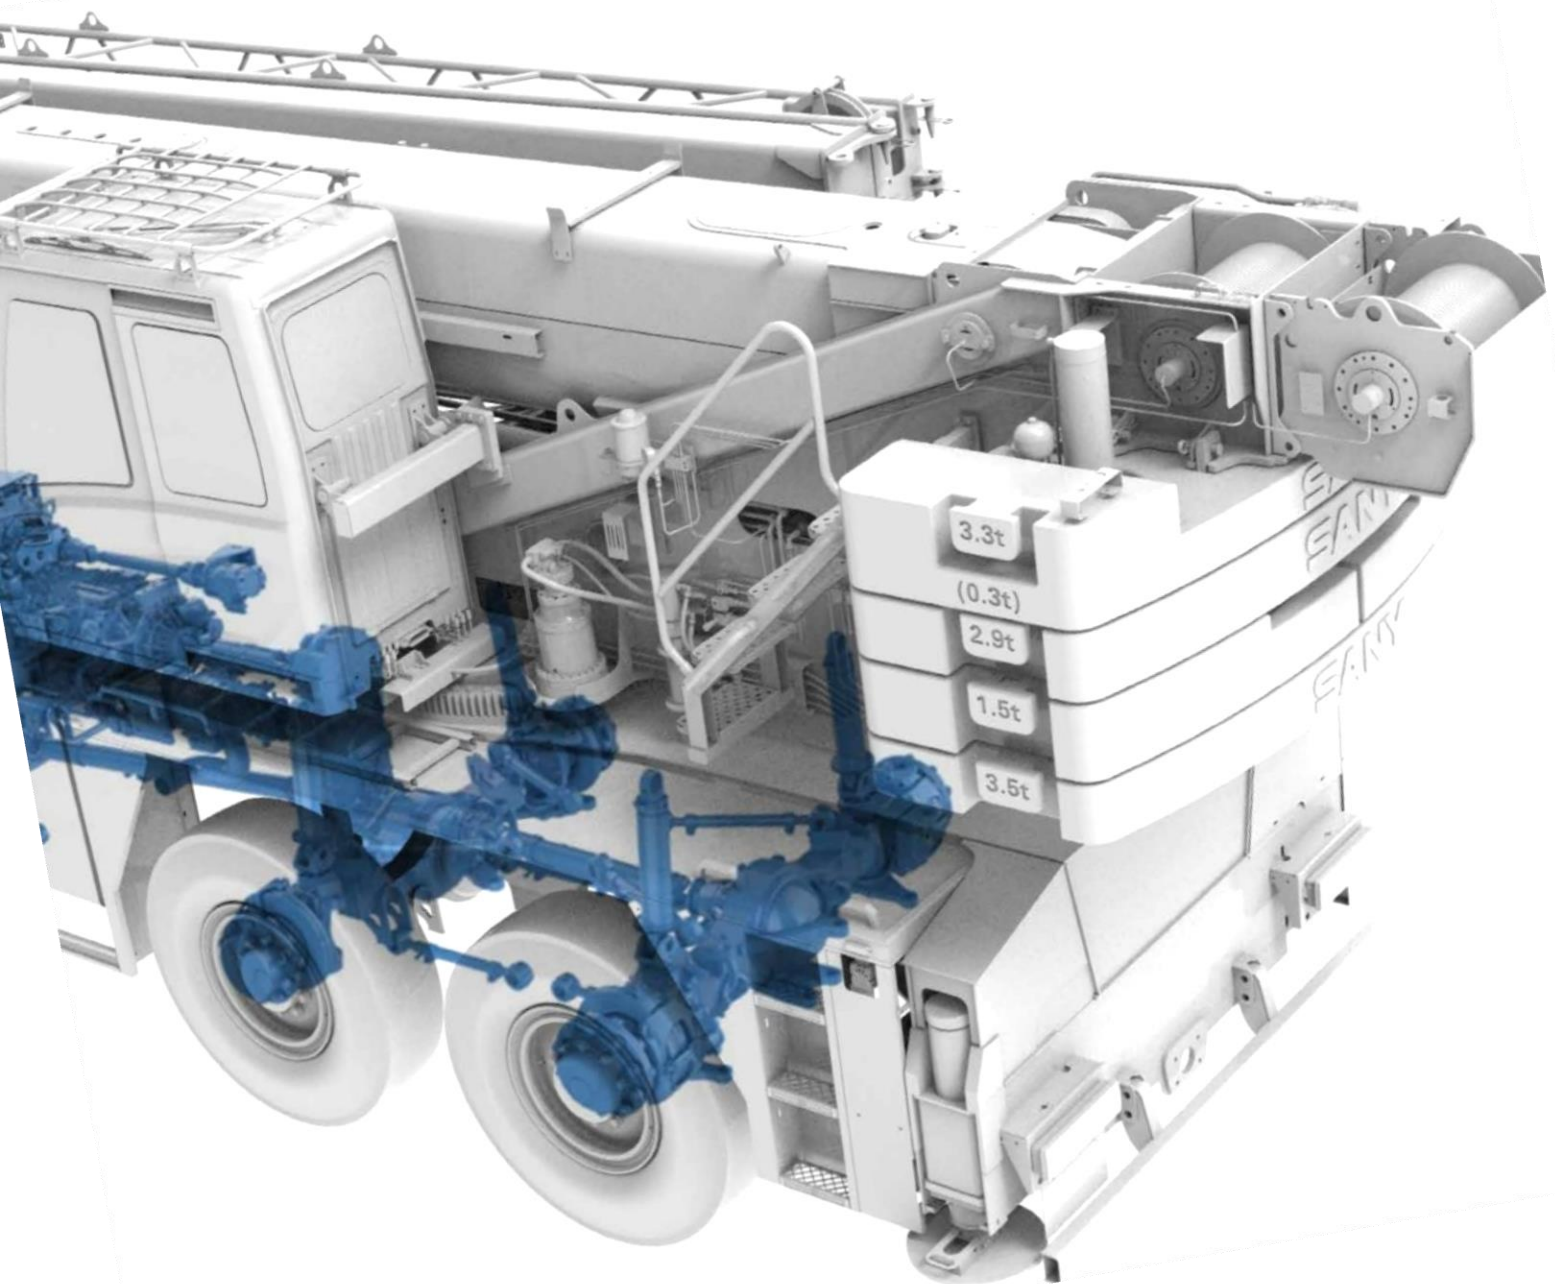

Standard 6×4 drive mode, with axles 2, 3 driven.

Optional 6×6 drive mode, with axles 1, 2, 3 driven.

Steering system

Dual-circuit power steering gear, and dual-circuit power steering system, with all axles steered.

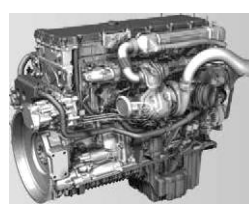

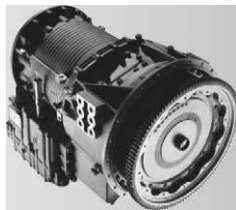

KESSLER-CO

Allison
Transmission

Mercedes Benz

Electrical System

Smart CAN-BUS communication system

International advanced CAN-BUS data communication network;
Safety controller of redundant design featuring fault diagnosis (conforming to EN13000 standard)
CAN-BUS networking applied for display, instrument panel, I/ O module and main sensors, allowing for high-speed data transmission, and quick response less than 20ms.

Smart fault diagnosis system

Safety controller functions monitoring, BCM power distribution management and is integrated with fault diagnosis system, enabling accurate fault location, and convenient inspection and maintenance.

AEC-approved console screen

Specially designed for SAC600E, and integrating functions including suspension control, steering control, outrigger control and data calibration

Precise load moment indicator

SANY independently developed LMI, with an accuracy of 0 ~ 5%.

Cabling

Centralized junction box and heavy-duty connector applied for cabling of superstructure, convenient for maintenance; IP rating up to IP67, ensuring high reliability.

Winch monitoring system

Winch cameras equipped for monitoring its working condition and identifying rope disorder in time.

Integrated bus button panel input

Various operating states displayed by button indicator lights, and one-button multi-functional operation realizable by writing various operation modes

Anti-two-block switch

Third wrap indicator

Cable reel

Cable reel inside the boom

Anemometer

MachineLink⁺

ROOTCLOUDT-AMS Pro device comes as standard to realize GPS trajectory, machine status, maintenance management, E-fence, alarm management, and operator management on computer or mobile MachineLink+ platform, by remote control of cranes. This telematics package greatly boosts efficiency of customer fleet management and helps provide better after-sales services.

Hydraulic System

Single cylinder pin

6 boom sections of variable length combinations, realizing higher lifting capacity at larger radius; automatic telescoping, time saving and labor saving.

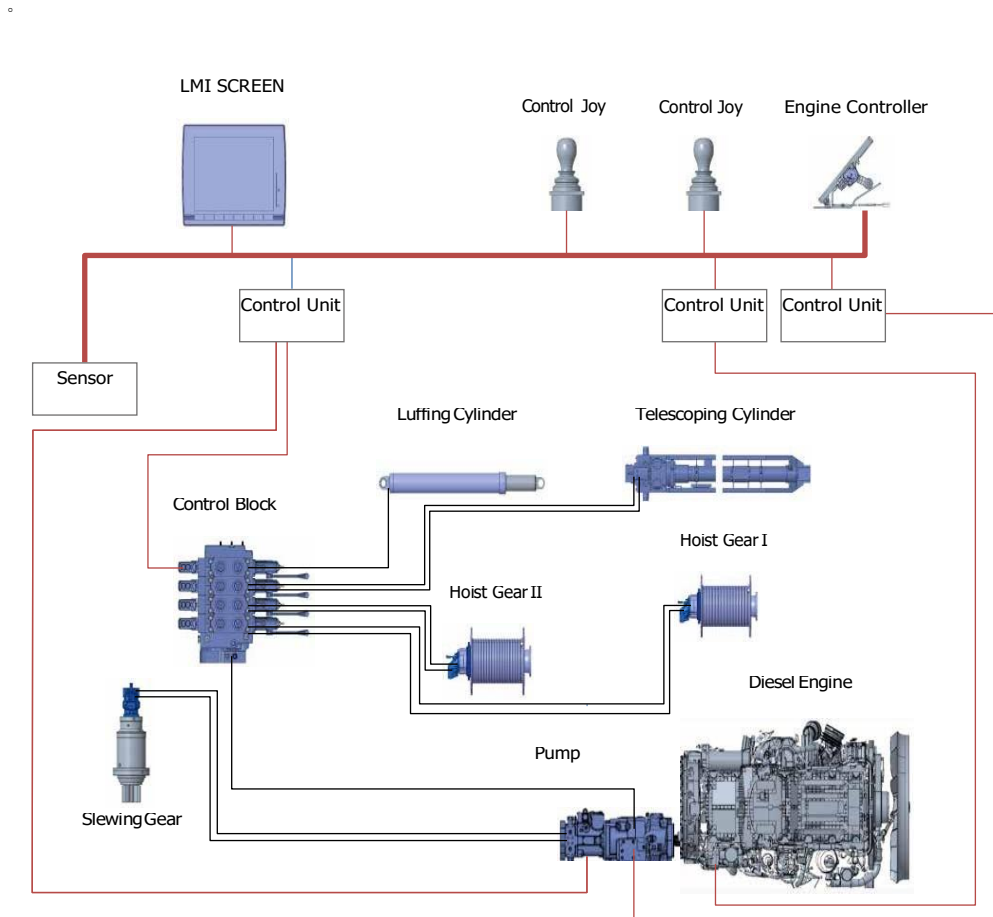

Superstructure

Open-type electronically controlled load-sensing system and closed-type slewing system, enabling combined operation of four actions at the same time;

Electro proportional compensated passive luffing-down system applied to control the luffing speed, making luffing more reliable and stable;

Closed-type slewing system, ensuring no pressure loss and no overflowing noise upon start/stop, and making the operation quieter and more energy-saving;

Electronically controlled load-sensing hydraulic system, electronic joystick and electronic throttle, ensuring easy operation and more accurate control and millisecond-level action response speed, with min. single-rope hoisting speed $\leq 1\text{ m/min}$, and distribution difference in case of combined motions $\leq 8\%$.

Chassis

Dual circuit + emergency main steering system

Main steering system: Dual oil pump directly connected to the engine to supply oil independently to the steering gear, ensuring efficient and reliable steering.

Emergency steering system: A Rexroth bidirectional piston pump installed on the transfer case, ensuring steering assistance throughout the traveling.

Electro-hydraulic assisted steering system

A Rexroth load-sensing piston pump installed to supply oil for assisted steering, which is directly connected to the engine and always in the standby mode, so that the assisted steering system can respond quickly once the assisted steering command is received.

A large-capacity accumulator installed as back energy to support limited times of normal assisted steering when the power is lost.

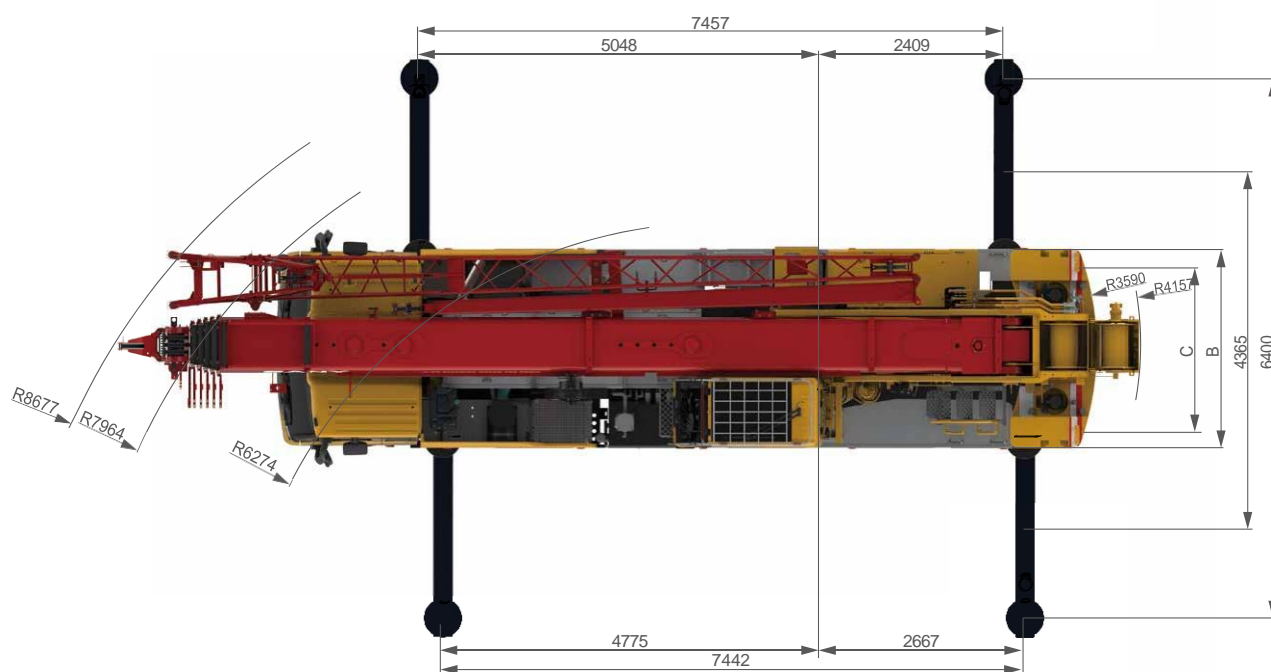

Suspension system

A Rexroth piston pump adopted as the power source of suspension system, and suspension modes electrically controlled to realize normal driving and driving with CW on board with suspension locked; suspension to be locked when the crane is operating.

Outrigger telescoping system

Full-electric control of outrigger, realizing arbitrary telescoping and auto leveling.

°

Remark: A column is calculated when suspension is at middle level. A* column is calculated when suspension is at lowest level.

Crane Introduction

Carrier

Carrier frame

- Box-type welded structure using high strength steel plate, higher bearing capacity.

Engine

- BENZ OM470LA.E3A-3, in-line six-cylinder diesel engine with watercooler and inter cooler, complying with Euro III emission standard.
- Fuel reservoir capacity: 450L.

Transmission

- speed ratio range, high torque output.
- Allison

Axle

- All wheel steering. Planetary transmission with differential lock. Driven by axles 2 and 3 (standard equipment).
- Axle 1 steered mechanically with hydraulic booster, axles 2 and 3 steered hydraulically. Easier and better maneuverability.

Suspension

- Hydro-pneumatic suspension with hydraulic lock, range $\pm 100\text{mm}$ in height. Smooth driving, anti-tipping.

Tire

- Size 385/95R25 (standard equipment), radial tires.

Braking

- All-wheel air brakes. Dual circuit disc service brake via pedal, parking brake via joystick, exhaust brake available for prolonged life of brakes.

Outtrigger

- H-type layout, with hydraulic cylinder, auto-levelling.

Control system

- CAN-BUS communication, 24V DC, two battery sets (180Ah each), manual power-switch.
- Low energy cost (5w) integrated display system, LCD screen.

Crane Introduction

superstructure

Operator's cab

- Corrosion resistant bodywork of ergonomic design including softened interior trim and adjustable seat.

Boom system

- U-shape welded structure using high strength steel, single cylinder pin mechanism. 2-stage folding jib offset at 0°, 20°, 40°.

Slewing

- Slewing platform designed by SANY, 360° slewing. Electro-proportional closed type hydraulics for smooth operation and better inching motion performance.

Hydraulics

- DANFOSS PVG main valve, higher efficiency for single motion and better maneuverability for combined motions.
- Auto adjustable oil pump with higher power use ratio and less energy cost. Variable plunger pump featuring load sensing and constant power control.

Hoist

- Main and auxiliary winch wire ropes are 15mm in diameter and 220m in length.

Luffing

- Passive luffing down with dynamic compensation. Boom angle: -2°~ 82°.

Safety equipment

- Self-developed LMI.
- Hydraulic balance valve, relief valve.
- Third wrap indicator, A2B switch.
- Anemometer at boom tip.

Counterweight

- Fixed unit 3.3t, removable units 9.7t.

Optional equipment at extra fees

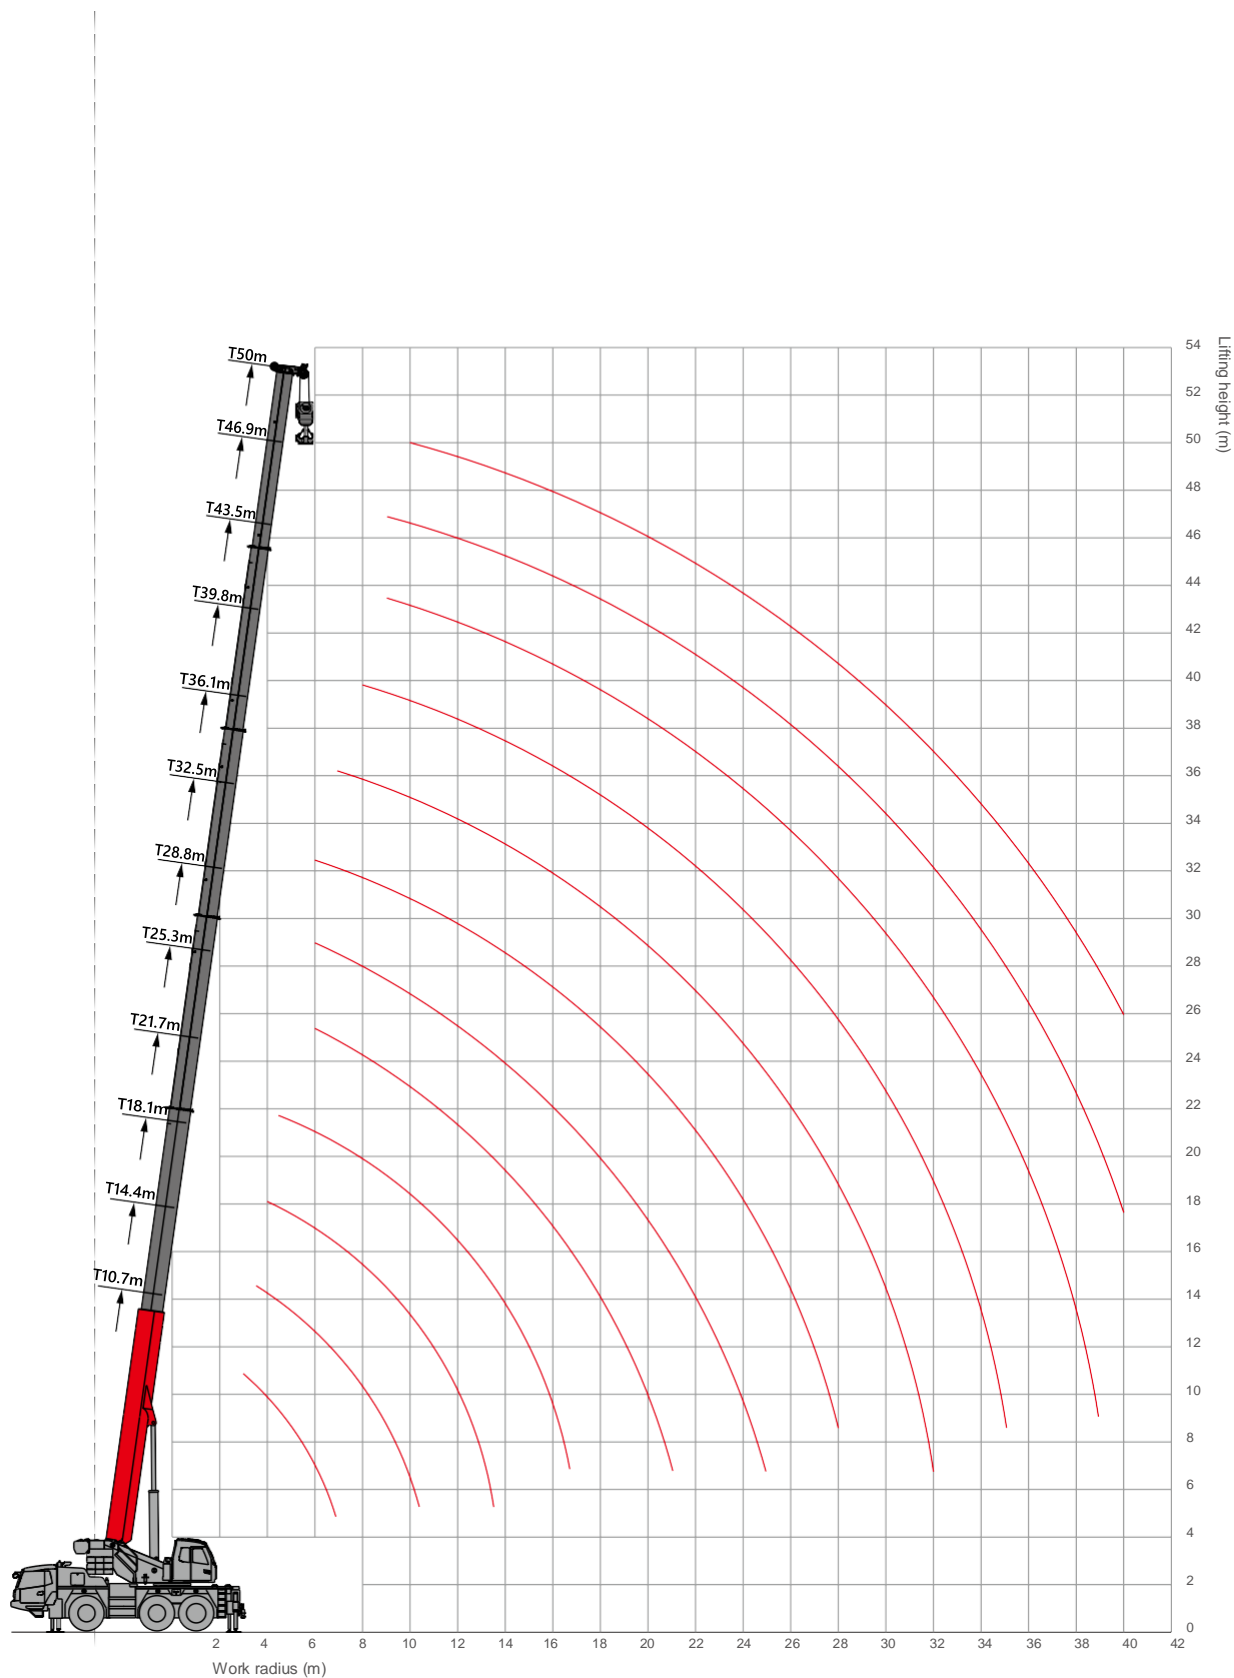

- 60t and 48.9t capacity hook blocks.
- Auxiliary winch.
- Auxiliary jib.
- 6×6 drive mode.
- Tires size 445 and 525.
- Hydraulically adjustable swing-away jib.
- Customized painting.
- Other equipment available upon request.

Working Conditions & Code Description

T - Telescopic boom
F - Fixed jib
HJ - Hydraulically adjustable jib
AJ - Auxiliary jib
